The Files inside the zip folder.

How it works:

1   The **AppsBuilder Website** folder can be uploaded to your hosting. It is a bonus landing page that we have offered to you.

2   The **AppsBuilder Script** folder can also be uploaded to your hosting. You may use it as your own login instead of logging in via http://appsbuilder.xyz .

       NOTE: You need to purchase the Extended License for the entire full source code script that is white-label saas.

Name	Size	Packed	Type	M
..			File folder	
1. AppsBuilder Website			File folder	1,
2. AppsBuilder Script			File folder	1,
3. Documentation			File folder	1,
Apps Builder version 1.3 READ ME.TXT	1,376	699	Text Document	1,
